

Armco Barriers

PCD01

Armco barriers are often used around car parks or within industrial and other buildings where forklift trucks operate. The purpose of this robust barrier is to create boundary demarcation and separate pedestrians safely from forklift trucks and other vehicles. Produced in our own fabrication department. Armco barriers can be made to suit site dimensions.

They are supplied galvanised or polyester powder coated and installed on site by our own teams.

Applications

Schools	
High Security	
Utilities	
Airports	
Retail	
Sports & Recreation	
Industrial Units & Warehousing
