

## Pulse Monitored Fence

PCD08

Gallagher Pulse Monitored Fence provides a high security solution for premises, factories producing high value or sensitive products, data centres, secure distribution centres etc. The electric fence works by giving a short, sharp, painful but safe electric shock to any would be intruder who touches it. There's also the obvious visual deterrent. Complies with BS1722:PART 17

We are a certified **Gallagher** Channel Partner for the Sales, Installation and Maintenance of perimeter systems.

## Applications

|                                |
|--------------------------------|
| Warehousing                    |
| High Security: Vehicle storage |
| Utilities: Power stations      |
| Airports                       |
| Retail   Sports & Recreation   |
| Industrial Units               |

## Product Data

|                   |   |
|-------------------|---|
| <b>Standalone</b> | The stand alone configuration is designed to integrate with a customer's existing alarm panel using simple I/O connections. This allows the fence to be integrated with the site's alarm panel, allowing arming, disarming, and alarm management. |
| <b>Networked</b>  | F series Fence Controllers can be connected via <u>HBUS</u> to Command Centre, where alarm monitoring, hardware/software configuration and data reporting can all be undertaken.  |
