

## Weldmesh Fencing

PCD06

Weldmesh fencing provides a cost effective perimeter fencing solution for sites such as schools, factories, distribution centres and sports facilities. Supplied on a roll in wire diameters from 2.5mm to 3.5mm, weldmesh is fixed to horizontal wires which run through either steel or concrete posts. For sites where more security is required, a top extension or either barb or razor wire is easily installed.

Weldmesh can be supplied with galvanised finish or galvanised and powder coated green or black.

## Applications

<b>Boundary demarcation</b>	
<b>Perimeter - low security</b>	
<b>Perimeter - medium security</b>	
<b>Schools</b>	
<b>Warehousing</b>	
<b>Industrial Units</b>
