

Palisade Gates

PCD15

Palisade swing gates are especially popular as they are often combined with palisade fencing and together offer an effective security solution.

Very large span swing gates need a very large space to open into, so sliding gates may be more suitable.

Palisade gates are available in a range of standard heights and specifications to match the style of fencing. Suitable for entrance widths up to 1.6m, with wider entrances normally requiring a sliding gate. The gates can be galvanised or powder-coated in any colour, plus company logos added.

Applications

Warehousing
High Perimeter Security
Utilities
Airports
Retail
Industrial Units

Product Data

Finish	Hot dip Galvanised to BS EN ISO 1461:2009 and polyester coated to a range of RAL colours
Gate Height (wide range of heights available to suit your application)	1.8m - 5.0m
